FIBERNET TELECOM PRIVATE LIMITED
WE Design Develop Deliver Optimum Efficiency …

About Us

Fibernet Telecom Pvt. Ltd., Private Limited,   is next generation IT & Telecom Infrastructure consulting service company, headquarter based in, **Head Office:** Unit No-106, C - ONE, Budh Vihar, Badarpur, South East Delhi, Delhi, 110044, **Site Office**: Okhla, Industrial Area, Phase -2, New Delhi/NCR.

- o The whole idea and motives is to design, develop and deliver the latest demands in IT & TELECOM INFRA including supportive system software's, software's and mobile application to speedup of modern business and services.
- o We transform businesses across all touch-point of customer experiences with our digital transformation solutions.
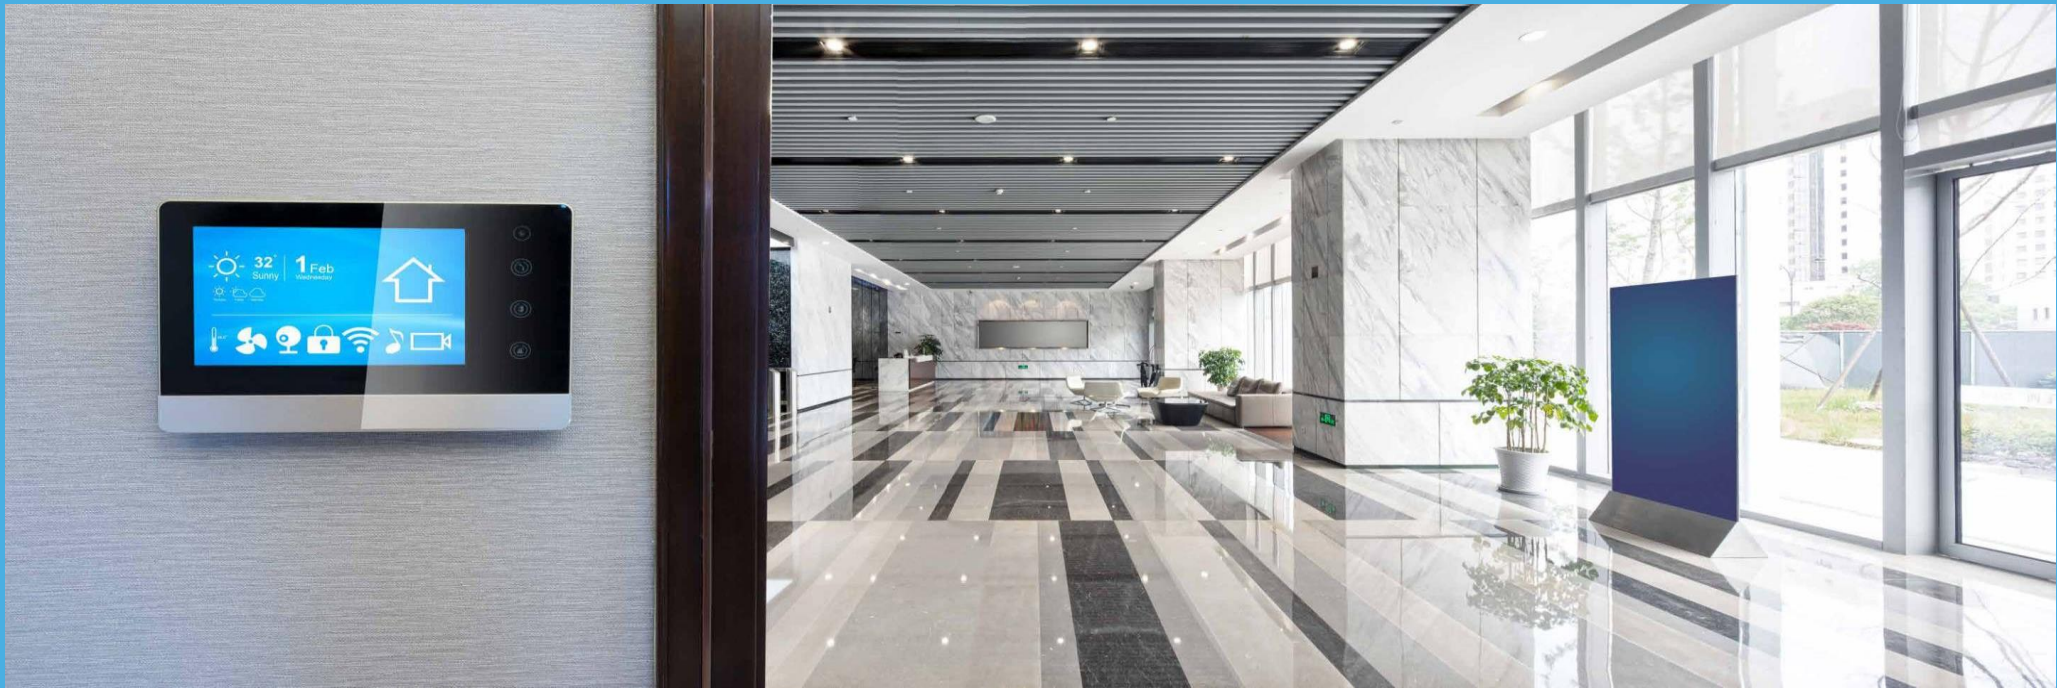

Business Intelligence

Our team has worldwide ground working experience in end to end software and services establishment for our national and international cliental differentiates us from others. From the quality product selection to installation, we are premium systems Integration Company that provides the best audio visual systems, unified collaboration. We understand your requirements and design innovative. Cost-effective & turnkey solutions in the best way possible to enhance customer experience.

- Centralized Data-Centre
- Rack Mounted Hi Speed Servers
- KVM Switch with Remote Access
- Routing & Switching
- ELV Solutions
- Electricals Solutions
- Lighting Control
- LED & LCD
- CCTV Camera
- 24 X Monitoring

- Cyber Security – Firewall
- Access Control Systems
- Biometric – Aadhar Enabled
- Multimode - Audio Visual System
- VOIP Phones
- UPS
- GENSETS - POWER BACKUP
- SLOAR POWER
- Printer
- Scanners

- Boom Barriers
- Cartelized Storage
- Routine Automatic Backups
- LAN & WAN
- Air Conditioning
- Temperature Control
- Fiber Optic
- Uncompromised Network Solutions
- Lighting control for Highway
- Lighting control commercial sector

Unified Collaboration

Unified Collaboration is critical for the FIBERNET organization wide communication & collaboration. We are working towards enabling the workforce to work in a smart commercial setup. With our unified communication solutions including audio visual systems, lighting control, streaming we enable organizations with simple yet elegant interfaces. We partner with our customers as technology enablers to align a wide array of system integration solutions.

Our UC Solution Include

- PLATFORMS
- SMART CONFRENCE ROOMS
- High Speed Internet on Fiber Optic Connectivity
- Cyber Security

- SMART Home & Automation
- Datacenter & Networks
- SMART LECTURE HALLS
- INTEFRATION with LEGACY SYSTEMS

Industry Coverage

- Central Governments Campus
- States Governments Offices
- MNC's - Multi National Company
- PSU's – Public Sector Units
- Corporate – Private Sectors Company
- Universities -
- Education Institutes

- Hospitals

SOFTWARE SOLUTIONING

Corporate

Most of the times business require digital transformation and organizations are looking for accurate solutions to empower simplified and seamless integrations or transformation of their ecosystem.

We enabled the right environment with lighting, shed and temperature control that adapt your changing needs. We have a wide range of solutions for your space, budget and your performance requirements.

Our effective direction, control and scheduling systems enabled them to communicate and manage efficiently and securely.

Education

We offer AV and lighting controls solutions for smart educational spaces including recordings & streaming, multi way speech reinforcement system and interactive visual experiences enhancing the communication between students and a representative.

We offer AV solutions so that the students can seamlessly connect from anywhere at the same time also providing high-tech class rooms for seamless collaboration.

Central and States Governments

We are experienced player and offer solutions accordingly to central and states government's program requirements, offices spaces and guidelines. We have wide range of expertise in national or international program implementations as per the multiple high-end integrations, collaborations, specks, control checks and command centre's.

ELV Solutions

ELV System for Buildings ELV System for Buildings stands for Mechanical and Electrical (M&E) extra-low voltage System deployed in residential and commercial buildings for the Purposes of better control and security. Usually it comprises a variety of sub-systems like:

1. Data transmission IT Networks; Local Area Networks (LAN) using Fiber Optic, Copper or Wireless.
2. Telephone (PABX): Voice & Video Intercom
3. CCTV/ IP Surveillance
4. Fire Alarm System (Addressable & Conventional System)
5. MATV/SMATV/ IPTV
6. Sensors.
7. Vehicle Access Control
8. Door Access Control
9. Lift Access Control
10. Lighting Control
11. Public Address Broadcasting
12. Tour Guard Patrol
13. Parking Management
14. Audio Visual (Auditorium/ Conference Halls)

Data Centre with High Performance Servers & Network Equipments

Technical requirements for Data Center Security, Safety and Infrastructure Management are becoming more demanding, and those dictated by standards more complex with our people, our global footprint, our decades of experience and our technical expertise, it's our passion helping our customers to create a perfect Data Center through advanced products and technology. Data center operators are responsible for highest performance – in the most secure and safe environment. Pooling our vast expertise and experience in data center Extra Low Voltage (ELV) systems and Integrated Building Management (IBM) systems across several disciplines, we have created a comprehensive portfolio of products and solutions and onsite services for optimized sustainability, security, fire safety, and reliable performance.

- o Electricity Supply
- o Uniform Voltage with Proper Earthling
- o Power supplies & Power Backup
- o Access Control Systems
- o Fire Alarm Systems
- o Infrastructure Mgmt
- o Customized design

- o 24x7 Initiating, Planning, Executing, Monitoring, Controlling
- o Electronic Surveillance with Night Vision CCTV & motion detection
- o RFID Card-key Access,
- o Individually locked Racks, Cabinets and Cages
- o Advance Routing, Switching and dedicated network
- o Highly Cost-effective, versatile and expendable
- o Integrated voice & data applications
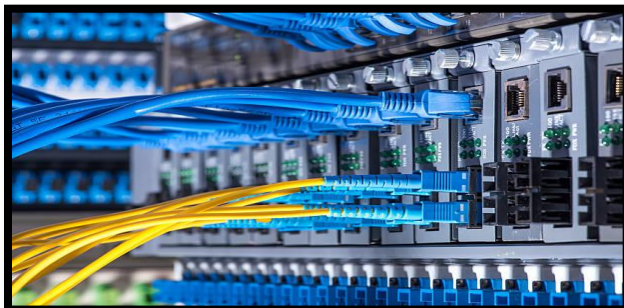

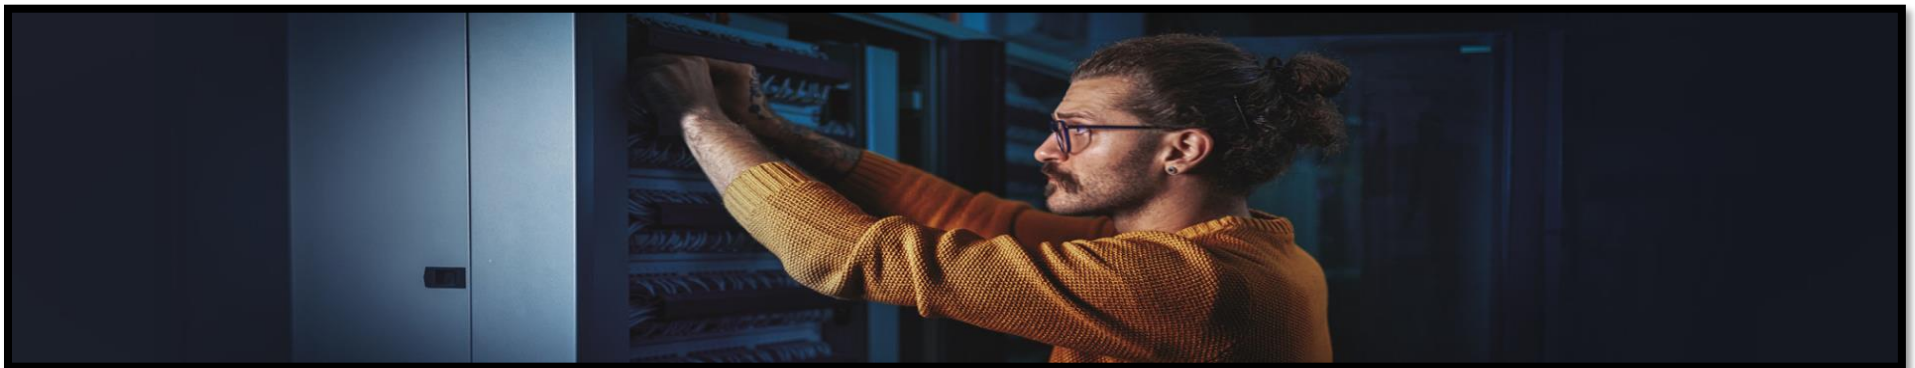

High-Speed Internet Connectivity

Internet connectivity has become the priority for the businesses worldwide. Our sister concern company i.e. Realnet Telecom is a Class 'B' ISP license providing high bandwidth and bulk bandwidth connectivity to customers at affordable and competitive price in India. Today's we need high-speed Internet connection for day to day operations.

It offers dedicated, secure and managed internet access to the renowned enterprises and home users through **ISDN** (Integrated Services Digital Network) leased lines and **Radio Links** (Air to Air) with the highest service levels.

Realnet Telecom (ISP) provides reliable business high-speed Internet data for any industry, as well as several scalable technology options to expand and adjust based on the needs of your business. As your technology and services partner we first understands your need and then offer you with a customized solution that meets your organizational needs.

Get Connected

- **ISDN** (Integrated Services Digital Network) leased lines
- **Radio Links** (Air to Air)
- Point-to-Point Ethernet connectivity
- WI-FI Hotspot Solutions
- VoIP Services
- IP Phones (Internet Calling)
- Database Center
- LAN/WAN
- Fiber Optic Connectivity
- Cyber Security – Firewall, Routers, Manageable Switch,
- VPN/IP Sec Tunnel, Site to Site VPN, MPLS BGP Implementation, Configurations and Remote Support
- End to End Network Architect
- Uptimes guarantee of up to 98.9%, 1:1 Port Capacity.
- End-to-end network encryption, monitoring and 24x7 dedicated local support
- Network uptime and 24x7 service support
- Vulnerability Testing
- Annual Maintenance contract (AMC), training and 24 x 7 Support

Cyber Security & Risk Advisory

Are you looking for a partner to solve your network, cyber security, applications and database compliance challenges? Fibernet handles severe incident & operations coordination through return to normal operations and up to 4 hours of incident response analysis and investigation.

TECHNICAL SERVICES

- Data Flow Analysis
- Managed Vulnerability Assessment
- Penetration Testing Services
- Secure Code Review
- Compliances as a service for PCI/DSS

RISK ADVISORY

- SERVICES
- Risk Management
- Information Security
- Maturity Model Assessment
- Business Continuity & Disaster Recovery

GOVERNANCE RISK & COMPLIANCE

- Control Assurance
- Third Party Risk

What Make us Differ from Others

Convenient & Affordable:

- o Own ISP and Bandwidth Distribution Centre
- o Best digital automation within your scope & budget
- o Optimum Risk
- o Durable

Easiest Integration & Installation:

- o Serve you from planning, design to installation
- o We provide training & user manual
- o Extendible with Future Requirements

User Friendly and Easy to use Devices:

- o User-friendly control systems
- o User Training and Operational Support (optional)

One Time Installation
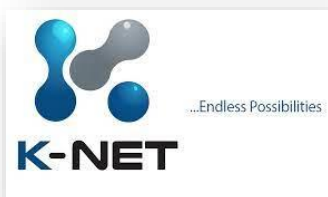

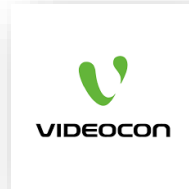

- o Life time comfort
- o Easily Restorable

Security & Safety

- o Get keyless Security for your Smart Entry System
- o Maintaining Redundancy and Diversity
- o Easily Restorable
- o Recoverable from Disaster

Support & Service:

- o Responsive customer support available
- o 24 X 7 Helpline
- o Instant Remote Support

Work Experience
